

March 17, 2020

Dear Third Grade Families,

As we are embarking into uncharted territory together, we wanted to reach out to you all with some resources and activities for our "Learn from Home" time. We know that some of our kids greatly benefit from sticking to a predictable routine and schedule. Below we have outlined different resources, ideas, games, and references that students may access in the form of a **possible** schedule. But, as Dr. B said, your kids are free to do as much or as little as you choose as a family and there is **no specific schedule** that the students need to follow nor is there an expectation that students are following a full schedule from home. Below is more something that **could** be helpful for some children during the unexpected time at home. Again, all learning activities are **optional** and any work completed during this period of time will **not be graded**. Teachers will be offering feedback on learning when appropriate. As always, if you have any questions or concerns, please don't hesitate to reach out to us!

Thanks,
Grade 3 Team
